📍 Lahore, Pakistan

### SUMMARY

Passionate and results-driven **Full Stack Web Developer and Graphic Designer** with expertise in **HTML, CSS, JavaScript, C, and C++**, and experience creating responsive web applications and visually engaging designs. Currently pursuing a degree in **Artificial Intelligence Engineering at UET**, combining technical knowledge with creativity to develop innovative digital solutions. Successfully completed multiple professional and academic projects, demonstrating strong problem-solving, design thinking, and teamwork skills. Dedicated to continuous learning, innovation, and delivering high-quality results that enhance both functionality and user experience.

### PROJECTS

#### Hospital Management System

Developed a comprehensive **Hospital Management System** using the C programming language to streamline and manage hospital operations efficiently. The system was designed to handle essential functionalities such as patient registration, patient record management, doctor information management, appointment scheduling, and data retrieval through a user-friendly menu-driven interface. Implemented structured programming concepts, file handling, and data management techniques to ensure organized storage and quick access to records. The project demonstrated strong problem-solving, logical thinking, and programming skills, and received positive appreciation from faculty members for its functionality, code organization, and practical real-world application.

#### Online Auction System

Designed and developed a **Full Stack Online Auction System** that enables users to buy, sell, and bid on products through a secure and interactive web platform. The system includes features such as user authentication, product listing and management, real-time bidding functionality, auction tracking, user dashboards, and responsive design for seamless access across devices. Focused on creating an intuitive user experience while ensuring efficient data handling and secure transaction processes. This project showcases expertise in full-stack web development, database integration, problem-solving, and building scalable web applications that address real-world business requirements.

#### Professional Document & Presentation Design

Designed and developed high-quality **Microsoft PowerPoint presentations and Word documents** for academic, technical, and business purposes. Experienced in creating professional reports, project documentation, resumes, research papers, visually engaging presentations, infographics, and structured content with proper formatting and modern layouts. Focused on clarity, visual appeal, and effective communication to deliver polished documents and presentations that meet professional standards and project requirements.
